Title: DRAFT - Alice : Alice and the Great Stallion
Universe: Tom, Ronin, Alice
Summary: Alice and the Great Stallion is a continuation in exploring
extreme size toy play, developing openness and permanent stretching,
as well as incorporating elements of pseudo-bestiality. Alice and
the Great Stallion includes some MF, toys, and fisting.
Keywords: MF, Vaginal, Anal, Fisting, Dildo
Language: English
Availability: PUBLICATION (Very Dirty Stories #7
<http://www.amazon.com/dp/B0051H8VSU>)

DRAFT - Alice and the Great Stallion

written by Max

MF, Vaginal, Anal, Fisting, Dildo

Ronin was sitting across from Alice as she snacked on some salad.
"Yummy," she said gleefully and gestured toward the fresh produce
they had picked up at the farmers' market earlier before taking
another biteful. Her uncontained glee put a smile on Ronin's face.

He reached over and picked up plump cherry tomato from a small basket
and popped it in his mouth. Alice watched as he chewed it, the
muscles of his jaw squaring his face and the way his eyes focused
someplace inside of him as Ronin tasted the tomato. Then she smiled
herself and pushed her salad plate away from her.

Ronin took his cue, finished his glass of water in one long drink,
and then he got up from the table. Alice took his arm and rose to
her feet, returning his hug, and then sashaying over to the couch
where Ronin had set out her big toys. "Mmmmm," Alice hummed, "can I
pick out the music?"

"Of course," Ronin smiled as he busied himself with straightening out a knit sheet on the couch and moved the toys out of the way but within easy reach. "Do I get to break you properly today?"

"Of course," was Alice's giggling reply. Her water silk wrap slipped along her hips and breasts as she moved, and she carefully picked out a Seabound cd and put it in the stereo.

Ronin chuckled. Alice's pussy was finally broken in for width, his fist and most of the thick toys slipped into her easily. But properly breaking in Alice involved one of his favorite new pastimes. He scooped up the stallion horse cock they had been playing with lately and set it first on the sheet.

Alice saw the toy Ronin had picked out and grinned. She came over to Ronin as the music began to play, and as he kissed her forehead she whispered "Are you going to horse fuck me again until I can't stop cumming over and over?"

Ronin made a guttural sound as Alice stroked his now decidedly hard cock, and said "Of course" very quietly. "You don't mind me forcing it into you as deeply as it can go and then driving my cock in along side it, do you?" he continued as he nuzzled her brows and then her ear.

His hands found her ass and Ronin pulled Alice tightly against him so he could grind his cock into her soft thighs. They embraced then, her soft body and silks against his hard form - the grey satin of his pajama trousers and his pale abdomen and chest contrasting with the splashes of colours Alice had wrapped herself in.

"Never," Alice paused and leaned back to look him in the eye, "as long as you don't mind me wanting more and more of it."

They both smirked then, happily matched in Ronin's drive to fuck Alice until she was as open and stretched as possible and Alice's drive to be filled and stretched and even broken so long as she could be filled and stretched even more. Ronin eased Alice down to the couch as she unwound her sarong. Then he worked his hands over her collar bone and down to her heavy breasts and thick nipples. As Alice slipped into the cushions and stretched out, Ronin stroked her abdomen and then her thighs.

She allowed her legs to part gingerly, one leg off the side of the couch to allow Ronin greater access. His fingers slipped down to her clit, and Alice put her hand on top of his, urging him to penetrate her. Alice's labia parted easily and wetly, and Ronin enjoyed sinking his fingers into them. Sleeping each night with a toy as thick as Ronin's forearm kept her moist and open, so it wasn't long before Ronin had half his hand inside of Alice's pussy and was stroking it deeper.

Alice's breathing started to come in heavy shudders and she coaxed

him on when she could form words with her lips. As the the top of his hand and thumb joint started to pry her open, Alice began to spasm from her first orgasm. Ronin coo'd to her and slowly whispered to her of how open she was getting each day, how wonderfully wet and easy she was becoming to fist, how soon he'd be able to slip his second hand inside of her. Alice may or may not have heard him, but her sighs and moans made it clear how much she enjoyed the way his digits stroked her inner walls and his knuckles dragging her labia in and out until they were so wet that they offered no resistance at all.

Ronin shifted positions, moving from leaning over Alice to sitting on the edge of the couch between her now widespread legs. He began to stroke her labia from her clitoris, around his wrist, and down to her ass. In response, Alice squirmed and tried to lift up to make her anus more accessible. She only half succeeded, but it was enough for Ronin to carefully work two fingers in alongside his fist in her vagina. The pink of her quickly reddening labia was bright against the pale white skin of Alice's inner thigh, and Ronin's slightly tanned hands stretched her labia thin to the colour of webbing between her fingers. Alice spasmed a bit more, and then Ronin withdrew his hand. Stroking his soaked fist and fingers along Alice's pussy to wet the lips further, he stood up and slipped his now iron hard cock directly into her.

Alice groaned and pulled on Ronin's ass to get him as deep inside of her as she could. His cock was stroking along the abdominal side of her vagina because of his position, but his hand had opened her sufficiently that only the head of his cock was being embraced by all of her velvety grip. Alice moaned some more, and Ronin calmly fucked her as Alice's juices worked up to a lather. She clenched down on him, gripping him with her strong vaginal muscles, and he thrust into her anyway forcing his way as deep as he could go - his pelvis bone grinding into hers.

"Are you ready for more?" he teased softly. Alice's eyes squinted at him and she mouthed "Always" as he continued to crush her labia and clitoris with his entire pelvis. Reaching behind him, Ronin pushed her hands from his hips with his own hands - still wet with Alice's cum and juices - then he backed out of her.

"Ok," he said with a smile, and he picked up the horse dildo where it had slipped between the couch arm and cushion during Alice's first orgasm. The cock wasn't horribly wide - only three and a half inches at the widest flare of the head, and maybe a three inches along the shaft until it grew like a tree trunk toward the bottom. But it was long - easily eighteen inches - and very flexible making it possible to shove more and more of it in as it folded and pushed in every direction to get fully inside of Alice's wet opening.

With a bit, only a bit, of some lube stroked on to the head, Ronin wrapped the flared shape in his hand to crush it down and then began to feed it into Alice's pussy. Horse cocks lack a human or dog cock

taper, instead they are a bit like a flying saucer atop a long shaft - so the head has to be squeezed down a bit to fit that flare in. With Alice that was becoming easier and easier as the mouth of her pussy became increasingly more open. And once the flare was inside of her pussy, it spread out so that both being driven and being drawn back it stroked her inner walls all the way to the furthest depth it could go.

Alice moaned and pulled her labia apart as best she could to make it easier for Ronin to begin to horse fuck her. His knuckles were against her labia and pelvis as the head popped into her, and she could feel it spread her open. Then Ronin put one hand over top of the other on the shaft, preventing the soft rubber from flexing, and began to shove the dildo into her pussy.

Once it was started, Alice could no longer hold her thighs or her labia apart. She sunk back into the couch and began to tremble from the width of the flared head as it drove into her. Once the first four inches of shaft were in, Ronin took his hands off and placed the base against his pelvis. Thrusting forward, he forcibly fucked the black vinyl cock into Alice - letting it flex and bend, but never allowing it to slip away, driving at it with a pause now and again to allow Alice to adjust before driving it some more.

Alice's g-spots were stroked in unexpected ways as the flexible horse cock started one way, met resistance, then bent the other way. As Ronin stuffed more and more cock into Alice - the dildo started to buckle and fold, and she could feel the bulges of those folds shoving against her belly and rectum simultaneously. The flared head created the sensation of a piston shaft being fitted to her vagina - causing a bit of a vacuum and stroking her inner walls the full depth. It wasn't long before Ronin had wedged more than half of the giant horse cock into Alice, and then she could feel his cock head ramming into her ass cheeks and labia as it thrust alongside the black rubber.

He leaned forward, all his weight on the horse cock, and dragged his teeth along Alice's nipples and breasts. "I'm going to fuck you as well now," and he smiled to Alice's deep gasp and grunt. Then he let his weight off the horse cock and began to drive his penis in between the top of the horse shaft and Alice's clitoris.

Alice groaned as the horse cock slipped out a bit with the removal of Ronin's insistent thrusting. Then his fingers dug into her stretched labia and pried open space for his cock. With a deep shuddering breath Alice tried to relax, but the sensation was intense as Ronin forced his cock head and then half his shaft into her overfilled pussy. Her muscles betrayed her, and more of the crushed in horse cock slipped out then as she began to clench uncontrollably. Ronin felt her hard spasming, and gripped the base of the dildo as best he could to force Alice to cum on both him and the toy. The angle was awkward and Alice's well worked muscles were strong, but he managed to keep her stretched and full throughout her Vesuvian eruption.

Then he leaned back, and allowed his cock to slip out of her stretched and worn out pussy. It was only a few moments later that most of the horse cock fell out as well under its own weight. Ronin kissed and nuzzled Alice's brow, and then kissed along her cheeks allowing his teeth to graze the skin and rough it a bit. Her pussy was still spasming and clenching uncontrollably, and Alice felt terribly empty right at that moment with nothing inside of her. The regular horse fucking was effective in increasing her continuous craving to be filled and stretched and stuffed with whatever could be driven into her.

Ronin smiled into Alice's eyes reading her body's hunger for more, and lifted himself up. His cock was still hard, though a bit soft from the rough treatment of being forced in alongside the horse cock. He scooped up the toy and allowed Alice to reposition herself. Then he set it on a towel and picked up a thick squat toy perhaps as wide if not a bit wider than his fist at the base - maybe four and a half inches - and ridged along the growing shaft that was eight inches in length.

It took him only a little work to start it into Alice's pussy, and before it was halfway in Ronin guided his cock head against her ass. Lifting herself up, Alice allowed her shoulders to sink down on to the couch cushion and then made her ass easier for Ronin to penetrate as his pelvis equally pushed on the wide base of the horn shaped toy. In this way Alice began to meet his thrusts until once again Ronin could feel her orgasm twist and tangle her pussy around something that just stretched her even further - but this time he felt his cock explode in her ass as the tremors gripped him and the toy.

His orgasm was met with a series of murmurs and soft vocal caresses from Alice. But her need did not abate. The thick toy was holding her open and filling her - not being empty felt so good. Ronin continued to thrust against Alice throughout his orgasm and afterwards, lightly dragging his clipped fingernails along her torso and face as she was penetrated further and further. Every pulse of hard contractions from her orgasm were followed by the muscles of her pussy relaxing completely and Ronin took advantage of this to coerce and coax more and more of the squat toy into her. When Alice's orgasm started to subside he would focus on teasing her nipples and running a finger over and around her clitoris until the teasing combined with the endless thrusts triggered another explosion in her loins.

After half an hour of this Alice's brown hair was matted around her face and shoulders, and she'd been driven until her head was pushed hard into the soft fabric of the couch arm. Ronin slowed and paused then, easing back and allowing the toy to slip out a bit into a cupped hand. Along his lower abdomen there was a definite imprint where grinding and pounding the toy into Alice had crushed Ronin's own flesh against his pelvis.

Alice sighed a bit as the toy settled a little lower with an inch or

so protruding. Then Ronin offered her his other hand and as she lifted up the toy slid out of her stretched pussy with a discernible thud. Even with Alice half upright it was obvious that her labia were stretched all the way back to her thighs, and the inner pink and red mouth of her pussy was bare and exposed. Only as she brought her legs together did the generous folds of her labia touch, and Alice could feel how this was entirely superficial as the sensation of air and fluids exchanged easily along her opening.

Ronin took a baby wipe and stroked it down the length of his cock to remove any dirt from pounding Alice's ass and force fucking her pussy simultaneously and afterwards with the thick horn dildo. Then he took a few minutes to use fresh wipes to do the same along Alice's anus, thighs, and pussy - mostly gathering up juices and lather from the vigorous fucking.

Then Alice returned to lounging on the couch with a towel underneath her as Ronin fetched some ice cold water and juice to rejuvenate them both.

"Mmmm... that was nice," Alice said calmly. "But it wasn't really deep enough." She stroked her fingers over the toys and felt each textured part of its shaft. "I need something that goes deeper."

They sipped on the drinks with Ronin stroking Alice's face and teased her perky and sweaty nipples. His chilled fingers felt good on her hot skin, but they also provoked a twinge and shiver with every touch. He giggled at her cringing and then poked her gently a few times as she tried to evade his fingers without spilling her drink or sitting up properly.

Finally Ronin took her drink, set it aside, and helped Alice up from the couch. She groaned and moaned a bit about getting up - but Ronin was insistent.

"I can find something to go deeper. But first you need to be more open," Ronin said and gestured toward a fucking chair he'd fashioned for further stretching and fucking Alice open.

While Alice waited, he brought over the special chair, and guided Alice to sit on it. The seat and back were comfortably padded, and Alice settled in with a few squirming motions to get settled. Once seated, the cutout within the chair seat allowed for full access from the front and beneath to Alice's vagina and anus.

With Alice's thighs comfortable on the U shaped seat, Ronin moved a small platform into position under the chair seat. On it he placed their latest toy. Unlike the flexible horse cock they had been playing with earlier, this oversized monster was fashioned of a more stiff vinyl rubber and scaled up in size. The dildo was originally thirty-six inches long, but all that length was wasted on Alice's poor shallow pussy - despite their greatest efforts Alice bottomed out around thirteen to fifteen inches with less flexible toys that

were only two to three inches in diameter. Even cut down the great stallion toy was massive though.

To make the toy more fun, the flare of the head included small rubber nubs to that were like fingertips dragging along the contours deep inside Alice. The narrowest part of the shaft beneath the enormous head was as thick the midsection of Ronin's forearm. It continued to the width of his bicep before it reached the point where Ronin had cut the length - approximately twenty-four inches from head to base. Again the artist had added some creative touches, taking a mostly smooth horse cock mold and adding articulated ridges and twisting veining that made for textures running length and width wise.

Alice shuddered a bit as she felt the flat flared head against her pussy lips. As open as she was, Ronin had continued to push and push and push as he said he would. He had set aside this special weekend to finally break Alice's pussy into the next size of toys, and it had been his preference that he do so using a horse cock. Playing with the big toys and using the "box" he had designed had worked well with tapered toys - the box was just a linear motor with a stroke arm that drove a tapered dildo of any width in and out of Alice without any intervention or interaction required. Alice could set it up by herself even if her arms were tired of pushing and pulling on a thick toy to fuck her pussy, the box could do all the stroking work leaving Alice to comfortably grind back and orgasm for as long as she wanted.

The box did not work so well with dildos lacking a tapered head though. The big flared head of their first horse cock and now the great stallion required Alice to be in a different position because the head could not be easily started by hand. The box worked best with something already past Alice's labia, as it could then just stroke it deeper and then back to the starting point just inside of her pussy. Otherwise the box's long stroking arm combined with the heavy rubber vinyl toys could miss their target and bruise Alice's pelvis, tailbone, or clitoris badly.

Even working it with both hands, Ronin could not start the great stallion inside of Alice. The rubber was pliable as it warmed up, but not pliable enough to fold like the other flimsy horse dildo. And at five inches across the widest part of the head, it was too sturdy and wide to work in edgewise without it popping back out as Alice and Ronin tried to apply force at angles to get it started.

Ronin was not easily daunted by this though. Once Alice was opened up so his closed fist came in and out of her with her labia simply stretching back and forth with it, he wanted to take her to the next level of openness. To really work his second fist into Alice he needed to break her pussy opening so it was wider all around, and slipping in a few fingers alongside one fist failed to give him the leverage to do that. Working with large tapered dildos with flared mushroom like heads worked ok, but the length of the taper meant it was only the last inch or so was really the thickness Ronin wanted inside of Alice. It wasn't enough to stretch her pussy's inner

muscles sufficiently to let his second hand in past the thumb joint.

The great stallion's more rigid flared head, with very little taper, would work like a plow - forcing it in and driving it even a few inches back and forth would force Alice's pussy into a kind of ease of entry that was only a possibility right now.

Alice knew this. She knew it would hurt too. Every time they had broken her pussy in the past, it ached and it was hard to put even small toys inside for days. But it was Alice whom had shown that every time she broke her pussy on new toys or with the box, it stayed more and more open. When she first was playing with toys to took daily penetration with thick vinyl rubber dildos to prevent her strong vaginal walls from closing up. Breaking her pussy had changed that, each time making permanent the ease of shoving thicker and thicker toys in. Alice enjoyed that a lot. So did Ronin. Even when it was just a matter of getting the opening of her pussy stretched out enough to start a wider toy, Alice thoroughly enjoyed and followed up on every opportunity to then drive that wider toy deeper and deeper. Or take a wide spherical candle and pound it into her pussy as deep as it could go with a smaller toy if necessary. So Alice saw the breaking, the hurting, the soreness and discomfort of a few days to a week as completely acceptable if it resulted in being able to fill herself more, being about to more vigorously pound something even bigger into her pussy, and being able know that her pussy would stay open all the time - more and more open in fact - so Alice could enjoy Ronin's hard cock and his fists and their toys in any combination of two or more.

Ronin fussed a bit with the great stallion on the elevating platform as Alice centered herself and willed herself to be calm and relaxed in the special chair. The platform supporting the base of the toy was designed to lift up a few inches, and Ronin was using padded straps to hold Alice's thighs in place so she didn't just get lifted up by the upward thrust of the toy. He fussed some more until she eyed him with a look of "Enough already" and then he sighed and settled back on his haunches in front of her.

"Are you ready?" he asked. He stroked her hair back out of her face, and saw how relaxed Alice had made herself. Her expression and even her focus seemed further into the space she liked to be in. Very gingerly he stroked her neck and breasts, his fingers very light but registering as strokes of energy painted on a still sky. Finally he reached between her thighs and wetted her labia with a bit of lubrication as well as the head the toy just below. With one hand guiding the great stallion's oversized flared head to prevent it from missing the dead center of her pussy, Ronin nudged the motor switch and put it in Alice's reach.

Slowly she smiled, like sun shining over green valleys and rolling hills, and then she pressed the button. The plate moved very slowly, and Ronin allowed his fingers to slip out of the way of the monster sized horse cock head as it pressed hard into Alice's labia and

pelvis.

Alice let go of the button. She wiggled a little, reaching down to adjust a bit, trying to scoot forward in the chair as best she could before realising it was easier to press the toy head away from her clitoris rather than to move herself with her thighs strapped down.

Then Alice pressed the button again. The flat head was grinding into her clit and her anus, a hair's breadth from her tailbone. Alice squirmed a little more but continued to hold down the button and the slow motor drove the plate in the tiniest increments upwards. Ronin stroked his fingers along Alice's vanishing labia and tried to force the head back away from her clit a bit.

Ronin shifted positions focusing less on watching Alice's pussy and the great stallion head, and more on her overall body language. He stroked her arms and shoulders which were already building up with the pressure and tension she could feel applied to her pelvis. Alice released the button and felt around the rubber flare of the horse dildo head with her fingertips. It was folding inward the slightest bit, as it made firm contact with her pelvis bone to the left and right. It covered not only her pussy but also her anus, meaning it might tear the skinfold between her anus and vagina a bit. The edge of the flare was scraping her clitoris but was just forward of the tip of her tailbone.

Ronin looked into Alice's eyes and judged her thoughtfulness. "You don't have to force it today. It can wait until you've opened up more with double penetration from the other toys," he stated matter of factly. They had long discussed breaking her pussy to five inches using nothing bigger than quarter inch increments, but this toy was nearly half an inch larger than the next largest tapered toy that they used in Alice's pussy.

Alice considered that for a moment. Then she groaned a bit as she ground herself down against the firm head. She smiled at Ronin. "I want it though."

Ronin smiled back as Alice tested her pussy's will to be filled. "You know," he said quietly, "this all started with a question of whether you were ok being ruined for other men."

She nodded at him and allowed her hips to roll as she tried to wedge the horse head into her pussy's mouth. It was too big though.

"Now you have to ask yourself if you are ok being ruined for all but the biggest toys and double penetration. When you are ready to be force fucked by this great stallion cock there is no going back. Your pussy is already too broken to be filled by anything less than a fist - and this stallion cock is meant to break your pussy for anything less than a fist plus a toy or most of a second fist." Ronin kept his voice even despite his excitement at the thought.

Alice nodded.

"This toy is even bigger than a typical horse cock, so breaking your pussy with this dildo will mean there is likely no single accessible living cock that can satisfy your pussy's craving to be filled to its max. You'll be committed to fucking your big toys, fists, and fists plus cocks to get filled up." Ronin spoke slowly and deliberately.

Alice seemed to read the charge off of him. "Ummm," she sighed softly. "Too much talking. I'm going to break my pussy now," she said in a quiet determined voice. "If it's possible to get your fists both in me, if it's possible to get one hand in and the the other hand in my pussy too or in my ass, if it's possible for me to be fucked for hours by a toy this big..." Alice let out a guttural moan as she ground harder on to the horse cock head. Then she ran one hand out to stroke Ronin's stiffening cock. "If force fucking my pussy with the biggest horse cock you can find makes me stretched as far as is physically possible and means you can double fist me..." Alice pressed the button for a bit and then let it go as she continued gyrating her hips to stroke her pussy over the dildo. "To be able to pop this cock head in and out, oh stretching and burning but forcing my pussy open, then stroke it deep so it crushes all of my g-spots into orgasm... mmmhmmm... very nice."

Ronin took his cue. "Then it's time," he said as his hand closed over Alice's and the remote. "Even if this doesn't go in today we will keep trying until your pussy is permanently horse sized so I can fuck you with every toy we have and as much of my second fist as I can fit. I'll even make sure to prep the strap on harness so instead of the machine I can drive this cock in and out of you once you're pussy has been broken enough."

Together they held down the remote button, and the giant flared horse cock head began to fold a bit before Alice's pussy began to be forced to accommodate the thick rubber. Alice shifted and said "Ow" softly a few times. Then she finally had the head wedged into her labia, pressure driving up into her belly, and she smiled at Ronin.

"Ummm," she moaned softly as she leaned forward a bit. "Break my pussy with your horse cock... mmhmmm... horse fuck me all the way, even if it hurts, don't stop until my pussy is being stretched as far as it can go..."

She could feel the rubber touching bone in front, sides, and back. Something would have to give to get the toy in, and who knew if it could even come out.

"It'll tear you a bit."

Alice could feel the cock head flexing against her bones, and her excitement mixed with the crushing pain from the skin on her pelvis. Ronin had made her slippery and moist enough that the skin would not catch and tear, but Alice's entire pelvis was being fucked by the

great stallion head - not just her vulva.

"I'll heal... unhhhh... don't stop... it... ow ow ow... oooooh..."

Alice was squirming with the increasing pressure on her pelvis - and for a moment she felt a sharp lancing arc of pain from her anus as the toy slipped off the front of her pubis and repositioned with even more force on her pussy and sphincter. Then she began to feel the rubber slipping a bit into her labia, now between the bones and pushing at the bones.

"It'll ruin your pussy for cocks."

Ronin watched as the cock head seemed to fold a bit. The continual slow build up of pressure was both forcing the flares of the head to deform and defining a shallow divet from clitoris to the sides of Alice's pussy that the head was starting to conform to.

"Uh-huh.... I know. mmmhmmm... ruin it then... I want your fists fucking me... both of them... and your cock too... oh god oh god... aieeee.... ohhhh..."

Ronin's other hand ran around the edge of the rubber horse cock head. It was now fitted into Alice's pelvis - trying to penetrate everything between the bones. The heat and wetness of Alice's pussy was causing the toy to deform even more now. Both of them kept urging the motor further in and up with the little remote.

"It's going to go in now - and in the process it's going to stretch your pussy as big as it can go. There's no room left from side to side or front to back."

Alice sighed "Mmmhmmm" under her breath and then steadied herself on the special chair. She could feel her anus and her pussy stretching, and there was an intensity to the stretching and penetration that was triggering white hot flashes and surges through her body. The lightning strikes on her nervous system were not a sexual turn on per se, but they were so intense that Alice was shaking and straining.

Ronin watched carefully for bleeding and body language that might indicate that he needed to back the toy out immediately. It appeared that it could go in, but that the size incremental was too great. But Alice kept her finger firmly on the button for the motor despite the wracking fits that were starting to cause her to shake and quiver.

Stroking her nipples and neck now, Ronin tried to harness the nervous system energy for sexual stimulation. That just added more jolts and bursts and Alice waved his hand away in a flailing motion. Ronin acquiesced, but took his finger off the button at the same time.

"Don't stop," Alice moaned. The motor continued with her finger on it, but she was now shaking so bad that she couldn't hold it down

persistently. "Ow ow ow... make it go in... it's so much..."

Ronin leaned in and kissed her. "Are you really ready to permanently break your pussy for this great stallion cock and both my fists?" His question was gentle and honest.

Alice let her head fall forward into his. "Yes," she said as best she could.

The metal stand that held the motorised platform (which currently was driving the great stallion dildo into Alice's increasingly distorted pussy) rested on a small hydraulic stand. By Ronin's foot was the hydraulic jack - one twist of a knob and the motorised platform and toy would be dropped three or four inches.

One step and the motorised platform and massive dildo would be raised approximately two inches. While intended as a failsafe in case the dildo or the dildo platform wouldn't reverse or were too slow to reverse, Ronin only considered the value of suddenly reducing the height/depth of the platform/toy. Now he realised he could forcibly drive the two inches of the horse head that was against and almost in all the way in with a single motion.

Ronin kissed Alice and pressed his foot on to the hydraulic pump lever. In one motion the force of a single footstep was translated into a massive amount of pressure that drove the stallion head forward in a surge.

At that moment three things happened simultaneously. The five inch wide horse head crumpled from the sides as it was thrust into the cavity formed by Alice's pelvis bones. That sensitive ridge of skin between Alice's pussy and anus was stretched first inward and then shoved aside by the hard rubber when it didn't yield - causing it to bruise terribly from a motion not unlike plucking a guitar string to almost breaking, then yanking it in an alternate direction, and the whole time not allowing it to snap back as it wants to.

And then Alice was horse fucked by the great stallion for the first time because the head went in.

It takes the brain a second to register extreme pain, so the rubber head was actually past the bone and expanding within the more pliable fleshy vaginal walls when Alice started screaming "Ow ow ow owowowowowow!"

Ronin was prepared, and hit the alternate release on the hydraulic support. The platform dropped leaving no support for the base of the toy, but even while Alice grabbed at the thick shaft of the great stallion cock the toy didn't come back out. Inside Alice the stretching and tearing was accompanied with a terrible ache from her sphincter as well as unquenchable burning. The cock head had expanded to it's full dimensions within the cradle of her pelvis, and the shaft as thick as the middle part of a forearm kept her labia

completely stretched around it.

Ronin unstrapped Alice's thighs with fast deft motions, and then let her collapse forward into his arms. Alice was sobbing a bit from the pain and didn't quite understand why the toy wasn't coming back out as it hung like a third leg from between her thighs. She couldn't properly grip the shaft and pull outward, and was now cycling into abdominal cramping as her body tried to both expel the intrusion and also suddenly gripped the thick head harder.

Ronin decided the best course of action was asking, and if no response then pulling the great stallion out. With Alice shuddering and spasming and sobbing on his chest he asked "Do you want it out?" As he expected there was no response.

So he knelt down in front of Alice and grabbed the thick shaft with both hands and pulled down. Alice came down with it - her full weight on to his head and shoulders as her body followed the force drawing her pelvis down. It took all his strength to get the toy close to coming out, and then the head was wedged on the inside walls of her vagina and pelvis bones from the other side.

"Oh oh oh, ow ow ow!" Alice began pushing and shoving Ronin away as the pain from that began to grow as the head began pulling on her pelvis from the inside. So Ronin let go and backed off a bit, placing a hand on her left shoulder. She heaved a huge sigh, and he dabbed at her eyes with a towel from the living room table.

"It's burning and hurts," Alice muttered mostly to herself, "but I'm starting to get used to it. Just leave it and let me see if it will stop hurting as much."

Ronin did just that, the forearm to bicep thick shaft hung from between Alice's thighs and he did not move to touch it. After a few minutes of just breathing in and out, Alice refocused her attention on Ronin.

"You broke my pussy again," she smirked with the first indication of a grin since the hydraulic lift had forced the great stallion cock head into her. Alice could feel the overwhelming sensation of stretching and the lingering feeling someone had kicked her hard right into the opening of her ass. But the shock of pain was fading, and it definitely hurt worse to move the dildo in any manner.

Acknowledging this, Alice gestured toward the collapsed support platform. "I think it needs to be held in place so it will stop moving."

Ronin nodded, and carefully reset up the hydraulic lift, the dildo platform, and then adjusted everything so the great stallion cock was supported by the platform rather than hanging by Alice's pelvis.

As he finished and Alice shifted position in an attempt to make his

work easier and her current state of extreme penetration and stretching more comfortable, she asked "You know what this means, don't you?"

Ronin had a lot of ideas on that topic.
